NA = not available.

Single year estimated N: Estimated number of Maine families with own children under 18 years that are headed by a householder without a spouse present.

* Families consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couples are included in the families category if there is at least one additional person related to the householder by birth or adoption. Responses of "same-sex spouse" were edited during processing to "unmarried partner." "Householder without a spouse present" is defined as a male householder without a wife present or a female householder without a husband present (Source: Table P38).
